

Notes to assist authors planning to submit items for publication in the *Scottish Journal of Geology*

Aim: The primary aim of the Journal is to publish papers relevant to the geology of Scotland and adjacent areas including the surrounding seas. Papers of general or specialist interest as well as short communications, letters to the editor, and discussions of earlier papers are welcome, together with reviews and thematic sets publishing the results of relevant meetings and conferences. Intending authors are invited to contact editors should they wish to discuss a project.

Online presence: The journal is available online as part of the Lyell Collection (www.lyellcollection.org) and GeoScienceWorld (www.geoscienceworld.org).

Submission: All contributions must be original. Papers, including figures and references should not normally exceed 12 printed pages. A pdf or Word file of the typescript should be sent to the Production Editor: sally.oberst@geolsoc.org.uk. No hard copy is required. Joint authors should indicate to whom proofs and correspondence should be sent.

Instructions for authors: A pdf of the paper may be submitted for review purposes. On acceptance, MS Word files of the text, captions and tables are required. Full instructions on preparing your paper can be found at <http://www.geolsoc.org.uk/sjg-authorinfo>

Colour: Colour printing incurs extra costs. Colour figures can be included in the online pdf at no cost. The same file is used in both print and online versions so the colour figure needs to be clear when printed in black and white. Estimates of likely costs can be obtained from the Production Editor. Please ensure that colour files to be printed are saved as CMYK, not RGB.

Foldouts: These will be accepted only after consultation with the Editor, and you will be expected to cover the additional costs.

Supplementary publication scheme: Detailed material such as locality lists and analytical data, will be made available as Supplementary Publications. These files are hosted on the Geological Society of London website. Acceptable formats for the online repository are: .rtf, .csv, .gif and .pdf (for figures).

Maximum size is 20 MB per paper (can be zipped if necessary).

Offprints/pdfs may be ordered on the form provided at proof stage. You will be given free access to 50 downloads once the issue is online; details will be sent directly to the author at the time of publication.

Open Access publishing: Articles can be fully Open Access (Gold Open Access) on payment of an Article Processing Charge (£1000/\$2000). More information can be found at www.geolsoc.org.uk/open-access.

If you require Open Access but cannot pay the APC, the Geological Society also supports 'Green Open Access', where you can post your final post-refereed version of the article to a website or repository 12 months after the online publication date.

Authors must not post a typeset proof or final version to any website or repository unless the article is fully Open Access.

Ownership: The *Scottish Journal of Geology* is the joint property of the Geological Society of Glasgow and the Edinburgh Geological Society. Queries regarding copyright and licensing should be directed to the secretaries of the Societies. On acceptance, authors will be expected to grant a license to publish and to accept the terms and conditions of use: http://www.geolsoc.org.uk/author_terms

Editorial Enquiries: More information can be found at www.geolsoc.org.uk/sjg or contact the Production Editor, Sally Oberst (sally.oberst@geolsoc.org.uk).
